Subject Purchase of 160 H P Motor and Starter for working the high lift pump now being driven by the oil Engine at Davangere Water Works, Harihar

---

Sir,

I have the honour to state that there is only one Electrical motor of 116 H P capacity to work the high lift pumping set at Harihar for water supply to Davangere This pumping unit is being worked for nearly 20 to 21 hours a day and there is no stand bye unit available even to examine the condition of the high lift pump, since it is not possible to take any shut down for inspection purposes

Prior to the installation of the electrical pumping unit an oil engine of 160 H P was installed and was driving a centrifugal pump of 25,000 gallons per hour against a head of 500 feet Owing to its long use the oil Engine has become undependable for continuous service and is therefore retained only as a stand bye plant for working only during the time of power shut down

Since the demand for water supply in the city has increased enormously, the quantity of water delivered by the single unit is found to be very inadequate and has necessitated the working of both pumps for longer number of hours It was proposed therefore to utilise the existing pump of 25,000 G P H and run the same by an ele-ctric motor of suitable capacity so as to have increased water supply with the head of both the pumps It is also found necessary to have one unit as a stand bye to meet any emergent repairs that may become necessary for the electrical unit

The matter was taken up with the Sanitary Engineer Bureau of Sanitary Engineering Bangalore and proposals were got up for the purchase of one 160 H P Electric motor with suitable starter etc complete The

P t o

matter was brought before the municipal council in their meeting held on 3-12-48 and it was resolved that this motor be purchased and installed to give relief to the improvement of water supply to the city and the estimate for Rs 14,000/- may be sanctioned for the purchase of the motor and for installation charges

Quotations for the purchase of the motor and starter were called for by this office and the quotation of Messrs Associated Ele-ctrical Industries Ltd , were found suitable The Sanitary Engineer, Bureau of Sanitary Engineering was again addressed in the matter and a copy of his report is enclosed herein for kind perusal. An estimate of the total cost of Rs 14,000/- for purchase and installation of the Electric motor and pump is herein enclosed for favour of communicating early sanction

In view of the approaching summer conditions it will be a very great difficulty to tide over the water scarcity in the city and the municipal council is very eager to give relief to its citizens even during this summer if it could be possible to instal the motor driven pump Under the above circumstances I request you to kindly obtain sanction of Government for the estimate enclosed herein and accord permission to place orders for the motor as per quotations received from the firm,

Yours faithfully,

Municipal Commissioner,

Davangere City Municipality
